here's our Eckasha System. Now the Eckasha's themselves are not falling. It's only the smaller Eeka-Veca systems within them. If they were all light balls within the bigger light ball of the Eckasha. It is only the smaller Veca systems that are falling when we talk about the fall. So we have our Eckasha; we have our parallel Eckasha. Parallel Eckasha a very very long time ago went through an experience very similar to what our Veca is going thru now. Our Eeka-veca's going thru now. This is where the first mess that culminated in our mess and in thier mess. Yeah. Over in the parallel Eckasha there was - you know I should put now the first of the timeline bit up, just b/c they just gave me the stuff on dates. I wanna make sure I don't accidentally say the wrong ones. [...] We're going to understand a bit of the History so you understand the players in the game now. B/c this is what we're dealing with now. These are also going to be names that you'll see have to do directly with what we call the victim/victimizer game that is running on this Planet and that is being pushed by off-Planet forces to

Disk 1
55:03

try to create what appears to be a Holy War between the Christians & the Muslims. And the Christians aren't doing it and the Muslims aren't doing it. It's being moved through them. And they are being manipulated into creating a drama based on defending their Gods. And this is why understanding some of this history & some of these names - And at least a round-about understanding of the Ecka-Veca maps will give you an idea about what this planet is in. We're not just joking when we say it is in a huge massive drama. It is huge, we're not just talking about one universe. We're talking about what is called a TRI-Matrix System. Where you have 3 Matrices involved - 3 Eckasha Matrices. That's Big. This is where the mess started. [...] They had me typeset this. This is how they gave me the information we needed to talk about today. They have been mentioning for... Since July little bits about this group called the Bourge - lil' bits about this bits about that. I had no idea where any of this fit in. and what the KRYSTAL River was - or any of this information [...] So they finally put the history in so we would understand the evolution of where this started b/c it's where it's ending and that's where we are Now

58:30

We are facing the final point that this whole crazy history of Building the Beast Machine; of the warring between FA races... it all started with one problem that occurred in one Matrix and that was called originally the Borenthasala Matrix. And what's interesting for those of you who might have read Voyager's One. There's a race called the Borentasai I believe they call it. They're connected with the Zetas and they have hybrid humans running around on Planet now too. And they're really cute actually. There's a couple of them that are like Models & actresses and things. And they have a very particular Borendt look to them. These aren't bad guys - these are a bioregenesis race that was taken out of what happened in this Matrix. Now this Borenthasai Matrix is the Eka level of our Parallel Eckasha, alright. So they were an Eka-level race which is a core level race. They're even before & more like Z... I shield coding than just the simple Vega density races. So there was a race called the Borenthasala races of our Parallel - they're a natural KR48tic race - of our Parallel Eckasha Eka. They experienced witnessing a natural Fall - I mean 'natural' in that yes Fall is a consequence of making energy decisions that culminate in your loss of being able to run KR48tic frequency

Disk 1
58:35

and if you just cooperate with what the elders always explained to you in the first place. There are certain ways to behave. It has to ~~be~~^{do} with love and being kind and not hoarding energy and all those things. And there's always little abuses of that as consciousness tests out how those rules apply. Well they watched one of those little test-out things happen in their own Matrix - not in their Echa level. But in their - I believe it was c...? their DN1 - DN3 system. So they watched one Vega quadrant in their Anti-Particle system go into Space Dust return because something - the consciousness that was the predominant consciousness in that Matrix had chose to do with the Laws of Energy. They were advised not to do but they did it anyway. Now the way it was described to me; and it's written here too and rather than just read it I'll try to explain because I'll get a bit more of the nuance of how they explained it to me. They were so... this KRystic Echa race the Borenthasala were so horrified by what they saw because they loved those people. They were devastated. They knew grief perhaps for the first time. And it created - b/c when you're like fully online with the KRystic grief isn't

1:00:00

even something that you experience because you know that nothing is ever lost and will always return to source it just depends on which path they'll return. So they knew all this already. But there was a connection with this particular group of Veda races that did go back through implosion that the Borenthasala's couldn't let it go because they were just grief-stricken. Grief can be a very blinding thing and it can give you twisted thinking. And they began to get a bit of that where they decided what they wanted to do was find out what the core of that problem is. How could something like that happen and what is the core problem? They analyzed that down to where they realized it was competition. So then they wanted to find out where does that come from? → Extremes in Polarity. OK they wanted to fix it. They wanted to first of all analyze extreme Polarity. Once they had identified competition between Polarity extremes as the cause of the twisted thinking that leads to the abuse of the natural laws of physics. Then they wanted to fix the KRYST and this

1:01:15

the KRYS

this is where they got messed up. They were KRYSic
Races. They loved the KRYS. But they thought
it could be even better if Fall Potential was
irradicated where nothing could ever fall.

Kinda like a nanny state where there was
always some body to take care of you and
make sure you couldn't do that. And they
did know better at one pt. in thier own evolution
that fall potential - fall occurs when certain
laws of natural energy are used & abused to
a point where you get consequence directly
to action. Alright, consequence & action were
the only temperance of the gift of freewill
that was put in this matrix*. Alright.

Something could come in and it had
Freewill. Source gave all of us Freewill. And
When we individuated we had that gift and we
could use it any way we wanted to. Even in the
extreme of using it in opposite to Divine Will
expression. But, in order to temper the abuses that
could be done with Freewill - instead of source
of God sitting up there [...] What was set
in motion with the Eternal Life KRYS code that
allows for the natural creation & re-creation
to continually occur was the

Disc 1
1:02:50Energy
= consciousnessin order-
based
worlds its
done this
way

the part of Energy Dynamics that has to do with action and consequence where there are certain consequences to certain actions - Consequences in Energy & consciousness. And falls result from a build up of abuses of the natural laws of energy of the KRYS that culminate in consequences of energy that create the Fall condition. So, it isn't something terrible or bad, it is actually what allows Eternal life to be eternal because it tempers Free Will. And Free Will needs to be tempered because once you get out in the hologram and you're no longer floating around in Source as part of Source directly. You're still in the manifest body of Source. And you're still made of the Units of Consciousness of God. But you can get really lost in holograms out here. Forget who you are... Forget what the rules are and you can make some really bad mistakes. That's how fall races end - up fall races. So, what the Forentasala's tried to do was because they were so devastated by the loss of those they loved. And they just couldn't they used to understand how/why

eliminated
in Falls?

Full potential was there and absolutely essential to the function of the KRYS code itself. So the perpetual motion of the - you know - regenerating light body would perpetually be there and nothing could abuse it so badly that it wouldn't kick-in with it's own immune system and create consequences in Energy that would stop whatever was trying to eat it alive. Like if a Black hole got to a certain level it will experience consequences. And it will be implosion. And what was in that Black hole will go on back to Source as units of Consciousness of Source, as Partikel Space dust on the next natural inhale or Adashi cycle. So, everything goes home. Nothing is ever lost and Source understands it that way. It is a Loring System. And it is something that the Sorenthasala's lost track of understanding thru the grief they experienced by watching it in operation in their own Vega System. And what they tried to do - they decided they were going to do a quarantined experiment in extreme Polarities. First of all they wanted to find out the ins/outs of and all the nuances

Disc 1

2

1:05:00

Reading
mylar

of how this thing called competition, competition for energy, violence - how does this happen? How does something that starts out KRYSIC get so twisted that it can behave that way? So, they began what is called the "Great 6-6-6-6 Quarantined Polarity Experiment" in their Matrix. What they did: ...] This was in terms of Earth time translation it would be "480 BYA the Borenthasala races of the Eeka in our Parallel Eekasha witness the organic fall & implosion of the DN3-DN1 PKA Veka quadrant within their Eeka Veka system. Blinded by grief, the Borenthasala initiate the Great 6-6-6-6 Quarantined Polarity Experiment in attempt to Discover the root cause of de-evolution and improve upon the Eternal-life KRYSIC code First-creation program in order to Eradicate Fall Potential."

Bad idea to start with But when you're broken hearted and have a hard time seeing through your tears I guess you could go there. And I guess there are people here who could go there because it's almost like this is a lesson we need to learn because we're watching one. And when we get out - if we get out, we'll be watching it from that kind of perspective. It would be a good idea to realize it's not as

Disc 1
1:06:35

merciless as it appears to be no matter how much grief you're blinded by. Because if you get blinded by grief you can do things that you meant really well. But they can go really really bad. And that's what happened here. They created this Polarity Experiment - the Eeka Borenthasala races first devised the "Victim-Victimizer" game program [...] they were gonna do it in a Quarantined System and I believe they went into their Density 4 - they went from the Eeka into Density 4 and 3 to do this experiment. It was supposed to be quarantined [...] only in the upper densities - small area of the upper densities of their Veka System. In one Veka Quadrant. So, they created the game program "You play the victim, I play the victimizer, let's see where that goes." But it was meant to be fair where it would flip. You'd have 6 cycles of victim → victimizer. Then the next 6 cycles would be victimizer → victim. Which means they'd switch places. Whatever group was the victim in the first cycle would be the victimizer in the next. and then it was supposed to flip back again twice where [...] they each get two

1:08:08

Disc 1
1:08:10

6-cycles of experiencing what it felt like to be on that side of Polarity. They didn't take somebody from some place else to do this with they took thier own ecka group that wanted to do this experiment and divided them up into three camps. One would be the control camp that would retain sanity - and retain what's called a natural tri-veca code. Alright, thier natural genetic matrix would be built on a tri-veca. [...] Just imagine instead of two circles together, you have 2 circles together plus a third. It's the natural configuration - the natural trinity configuration of Fastikl units. It is the natural KR4STic code, creation program or core program is built on tri-veca light units. And all gene codes that are KR4STic are built on tri-veca light units. What they did - and here's where this part of what later became the Beast machine evolved from - was they kept thier normal control group with it's natural tri-veca coding and then the other 2 groups [...]. These decisions are being made at the Ecka level. They're agreeing to incarnate in a controlled situation out of the Ecka into the Density levels of DN4 & DN3. And they're gonna put that little experiment there and theoretically they heard that you could lose track of yourself once you got into

Disc 1
1:09:50When?
Has
hybridization
ever
worked?

density forms. But it was a theory [...] that's why the control group was there. The control group was meant to make sure if the polarity extreme went too far and they were losing their own, the one with the tri-Veca code was meant to pull them both back out - and had the code that they could hybridize with them and in one generation bring 'em right back around where they wouldn't have the mutation anymore. Because how they studied Polarity was creating two race lines of their own - modifying them genetically to a bi-Veca code. Which means they took the 3rd element of the trinity out. And they gave one a dominant charge & one a passive charge. So they had extremes in gender Polarity. They had extremes in energy - running capacity. And they didn't foresee how bad it was going to get. It wasn't all put here (mylar) but they'd given me several pages of scribbled stuff about a month ago explaining this much about what became the Bourke. In this polarity experiment the Forentasala broke themselves into two groups. The other group doesn't matter - the one that took the victim stance - But

Experiment

the one that took the aggressor stance were called the Bourgh-Musala they were the ones who (started as victimizers in 1st round they got to the 2nd round - returning to victimizer stance) and the Bourgh Musala strain of the Borenthasala's got so lost, so fast b/c they couldn't even hear them any more. You know when they were trying to guide them, to telepath to them they completely shut off. But what they did have was a DN3/4 level of awareness and they created a time rip technology. Now this is before worm holes. Worm holes are much more stable. They're much more constructed. But there are ways to blast holes with Frequency through the light body structures of Matrices OR through a quarantine fence. And they developed on their own with intelligence that they did have a crude, but very effective time rip technology. The Bourgh group destroyed the other group, the victim group. There was no time for (the final) Flip to occur [...] they did 3 Six cycles. They dealt so poorly with being on the victim side of it that by the time they got back to being the victimizers again, that was it. They weren't gonna see the next

Disc 1
1:12:50

victim cycle. So, there should have been four 6-cycles. They ended up with three 6-cycles. And right there at the end of the (3rd) 6-cycle: they broke out of the quarantine. They destroyed the other race completely. They broke out of the quarantine force field of the DN4/3 System and spread like a wild fire virus. They took out the control group. They very rapidly caused the fall of the entire Ecka Veca - Not the Eckasha - but the Ecka Veca. And, while this was occurring, because it's our parallel Eckasha. We're neighbors, right? Our system with our Ecka-Veca are neighbors. The time rip that they used to rip all the way through their Ecka-Veca system to literally take the whole thing into Black hole Fall created an unnatural rip. It was almost like an accident but it ripped into our Ecka - just a little bit - just enough. Because, if you were watching from another Veca, like the Aquari were. They were watching from their Eckasha [...] that blow-out created a very unstable rip between our Ecka core and what became the Bourque Black Hole. That created a condition for everybody else who was watching.

1:14:30

Disc 1
1:14:33

Uh-Oh. They saw how fast the time rip technology had taken out their Eeka-Vecc System. Fast in terms of Cosmic years [...]. The quarantine broke 480 BYA alright. By 450 BYA the whole Matrix had fallen and the time rip had come into our Eeka system. That's quite a lot of Billions of years but it's short for something like this to occur. For a raider race to develop a technology and dev' it enough where you could take out this much of the natural light body structure - it usually doesn't happen. It was a learning experience for everyone involved. What was done when it started - because the Aquari groups saw what was happening during this period - they saw it was going so fast they weren't going to be able to stop it. But what they were hoping to be able to do is quarantine it in that system [...]. The parallel adjacent Eekasha is the Aquareon Matrix. These guys were close enough to do something about it, but far enough to not get sucked into it. Basically. And the Wesala Matrix was here and that didn't have a black hole in it yet. So these guys got together with the founder races in

Disc 1
1:16:20

our Eeka - with the Eieyani and our Adona
 races on the Eckasha levels to form what
 was called the Tri-Matrix, 1-2-3, Coalition.
 It was called the KRYSTAL River Cooperative.
 And what they were gonna do - what they
 wanted to do then but they couldn't because
 of the rip into our Eeka was they wanted to
 use the combined frequencies of thier 3 KRYSTAL
 Spirals to create enough frequency to create a seal
 on the Bourge Black hole system. It would
 be stronger than what they had learned to
 amplify & bend with thier time rip technology.
 It would have been fine and they would have
 got this all over with. Then if it hadn't been for
 the accidental rip and link that occured into
 our Eeka. Because if they had quarantined the
 Bourge Black hole then, it would have sent us back
 to immediate space dust. I say us, but most of us
werent even part of this Drama at this point.
Anglich humans did not exist at this point. This
 was way before. We're talking like 480 BYA -
 450 BYA. So instead they took the long way around.
 In order to let the life field that had been set
 into our Eckasha and Eeka-Veca system 950 BYA
 there was lot's of life field here. There

Disc 1
1:17:40~~Atah!~~

was lots of consciousness here doing well and that kind of thing. Instead of having them all going back as SpaceDust just to seal that rip, what they decided to do was several things. But they formed the KRYSTHL River coalition - there would come a time when it could be done. Now, they did a whole bunch of interesting things like doing HYBRIDIZATION experiments. Not experiments really - they were hybridization plans in order to - first they had to get the Aquari. The Aquari were the leaders of this. The Aquari level of the Hub level of the Aquari Matrix. Right that's the core - you know the core, the inner, the middle, and the outer Domains. The Aquari word goes with the outer Domain Races that were seeded into the outer Domains from two races of the Aquareon Matrix the Hub races which were the Aquirus Races and thier Edonic Middle domain races which were called the Aquafare. The Aquafare and the Aquirus^{cheep?} got together and created a race line of thier kind for the outer Domains first there and they did this in cooperative with that Tri Matrix-KRYSTHL River Cooperative. They Seeded first thier own outer domains.

Disc 1
1:19:00

into the outer Domains of the Aquari Matrix
 When it became in shorthand the Aquari Matrix
 It's actually the Aquareon Matrix. Which
 would be the parallel, adjacent Eckasha.
 The Wesala then hybridized with some of them
 and brought them in to the outer Domains
 of the Wesala Matrix. And then they were
 also brought in through some branches of
 our founders Races into our EtorA & AdorA.
 When I refer to EtorA & AdorA [...] So when I
 talk about EtorA I'm talking about the side that
 our universal 15-D time matrix is on. And, the
 AdorA side which is in the same place as we
 are - but at different Angular R.P.S. - the
 EtorA/AdorA System is our twin flame system
 in our Eckasha's Ecka-Veca [...] All of this
 history and at least beginning to understand
 where these names fit is important to what
 we're dealing with right here and right now. We
 have the Aquari line people coming from the
 parallel/adjacent Eckasha. We have us over
 here in our Eckasha and our now-fading
 Ecka-Veca system. We have still the viable
 portions of the Wesala Matrix that

1:21:20

Disc 1
1:21:25

didn't fall Blackhole. Now there's a whole history here that I may touch on a little bit later [...] We've got our Aquari brothers here. There's a whole lineage that evolved. [...] We got to where the first mess happened and it had to do with the great Experiment, the Great Polarity Experiment. This is where we ended up with the 666 part of the Metatronic Beast Machine which came later. These events are what caused - later - the fall of Metatron, the fall of the Wesadok & Wesadrak Matrices and the fall of a part of the outerdomain Aquari races from the Wesela matrix which became the Equari races. And the Equari races then broke through into our EtorA Veda and hybridized with one of our fallen Seraphim groups called the Omicron-Drakonians and created what are called the Dragoon line races that exist here and are very intertwined with the Angelic Human - well, now they're intertwined with the Angelic Human gene code. So [...] We are here on this planet and we're not gonna be getting off this planet unless we get the one Spanner Gate to Urtha open.

1:23:33

where we will become capable

Disc 1
1:23:30

OF riding starfire, natural starfire with Urtha. Because Urtha and SG4 Sala will be riding Starfire. They still have that natural capacity and they are aligning with the Base-pulse Rhythm of the organic Starfire Wave that would - the Eckasha level Starfire wave. So they can go into Starfire with the Eckasha. This is the one way out. Otherwise, you don't go back as Space dust immediately, No. You get quite a few Billion years probably living under the Domain of the WesaDraks and the Red Dragon Crew Because right now they are winning thier little polarity war. I'll show you... By the time I get done reading this you'll see how the polarity war developed into what basically you can look at in simple terms right now are the Red Dragon & the Green Dragon camps. It is more than just Red/green dragon races. There are affiliations and you'll see where they are. Then we'll be able to take that - and remember the VV game was a program that was created on purpose. We are in the middle of the end. We have hit the last 6 in this last round of the 666 cycle in this twisted black hole program and it 49 is beginning to manifest. And with

any luck, the Aquari I think maybe able to influence not just get us out, those who can still ride KRYST. Not just Indigos, any of the Angelic Humans that can ride KRYST, or host to ride KRYST. They will still do their best to get as many people into the natural Urtha so they can do starfire between ^{of Aquari} 2047-51. [...]

There is an Arc[^] to anchor tomorrow morning - the KRYSTHL River. [...]

You can see the calvary is coming, as far as the situation we're in in this Black hole system. If you can understand the importance of anchoring the KRYSTHL River Spiral it will probably motivate you to want to participate in the gridwork and energy activations that will take place tmrw. [...]

The Indigo Shield is under direct attack right now because they want to use us as a tool, as a weapon to open the Urtha gates so they can run threshold spiral into Urtha, and take Urtha and Sala (USG4) down with them. This is our chance to stop that and we are needed on the ground as well. Because if we don't anchor this frequency it's not going to anchor on this planet. And if that doesn't happen threshold will win and we will be eventually under the control of the Fed Dragon groups [...]

950 BYA the Ecka Eieyani seeded into Ecka domains of this Etorā Ecka-Veca system. DN5 Breneau & DN4 Elohei, Seraphi & Braharama Founders races seeded into this Veca by the Etorā Ecka races. 480 BYA the Borenthasala Races of the Ecka in our Parallel Eckasha witness organic fall & implosion of the DN3 thru DN1 PKA Veca Quadrant within thier Ecka-Veca System. Blinded by grief - tears are the Rainbow of the soul I hear - the Borenthasala initiate the Great 6666 Quarantined Polarity Experiment in attempt to discover the Root Cause of de-evolution and improve upon the Eternal Life evolution and improve upon the Eternal Life KRYS code in order to Eradicate Fall Potential. The Ecka Borenthasala devised the original VV game Program and seeded themselves into 3 DN4 Veca groups within the PCM Veca of thier Parallel Eckasha Ecka-Veca System. Two groups taking on bi-veca genetic distortion to explore Polarity extremes in competition. One ^{control} group remaining with organic tri-veca genetic Coding intended to pull the polarity groups back out of mutation once the 4 evolutionary

1:30:40

Disc 1
1:30:45

6 cycles of experiment were completed. The Bor-enthasala lost control OF the experiment at the end of the 3rd 6-cycle when one of the Polarity groups called the Bourgha Musala fell in to extreme Polarity disorientation destroying the competing Polarity group and developed a Time Rip technology by which they were able to break the Space-time quarantine of the Great Experiment invading the PCM Veka and assimilating the Borenthasala Control group. The fallen Bourgha Musala adopted a prime objective of advancing thier time rip tech for use in Assimilating all of Creation into thier Blackhole domain. Once freed from the quarantine of the Great Experiment and set loose upon creation the Bourgha Musala Time-raider Teams renamed themselves the Bourgha Musala-AhLama meaning the assimilators OF the Bourgha Musala. 450 BYA the fallen Bourgha Musala-AhLama further developed thier time-rip technology culminating in blackholefall of the Parallel Eckasha's Entire Eeka and Veka systems and formation of an unnatural, unstable time-rip between the fallen Eeka of the (our) Parallel Eckasha and the KRystic Eeka of the Adora side of our Eckasha. 450 BYA continuing the Tri Matrix KRYSTIC River Co-operative intervention team was established by KRYSTIC races in neighboring Eckasha Eeka Veka systems for the purpose of re-establishing the Q-tine 52

So rip went
to parallel
Earth →

Disc 1
1:32:40

on the fallen Bourgha Eeka-Veca System of the Parallel Eckasha to prevent the Bourgha from using thier time rip technology to fulfil thier Anti-KRYSTic objective of assimilating all other living time Matrices in thier vicinity into thier own Black hole system. The Aquareon Parallel adjacent Eckasha, Wesala adjacent Eckasha and Eieyani Founders Races of our Eckasha developed the KRYSTic Gyrodome technology to re-establish the fallen Bourgha Matrix quarantine. But this solution could not be applied while the unnatural Bourgha time rip continued to connect the parallel Eckasha fallen Echa-Veca to our Eeka. Our Eeka would go into Space Dust fall if the gyro-dome technology were applied at this point 45034A. The Tri-Matrix KRYSTHL River team voted instead to initiate a very long term evolutionary option called the Aqualene transmission by which the Eeka Veca races of our Eckasha would have time to evolve sufficiently to seal our Eeka time rip from within - or would at least have sufficient time to naturally evolve the life field of our Eeka-Veca out of density before our Eeka-Veca fell if fall could not be avoided. The Aqualene transmission referred to a specific collective of Edonic Middle Domain KRYSTic races called the Aquafare from the Parallel Adjacent Eckasha and thier corresponding

1:34:25

Dise
1:34:30

So the Bourge are attacking other worlds... not just this universe / time matrix (Explains the Blue-Rainbow Sun??) Isn't Urtha in this Eeka-Veca? So why is Starfire w/urtha helpful if the Eeka-Veca is all falling?

inner-HUB domain collectives called the Aquior. The AquafarE incarnated out into the outer Domains of thier parallel adjacent Eckasha Eeka-Veca System Seeding a Tri-Matrix KRYSTic Eeka-Veca race line called the Aquari which would be capable of running the TRi-Matrix KRYSTHL River Currents of the gyrodome within the Tri Matrix System when the time for completing the fallen Bourgha Matrix of time finally arrived. //reading stopped// This is what we're in the middle of - it is the time when they are going to put the quarantine in because this Eeka-Veca is falling anyway. So, what we are in the middle of is the final quarantining of the Bourgha Matrix and the running of the KRYSTHL River currents which are the KRYSTHL Spirals of those natural ~~currents~~ KRYSTic KRYSTHL Spirals of those three KRYSTic Matrices combined that will have enough power to bend Threshold backwards - 2/3's of it to form around Earth a quarantine which will allow Earth, even though it's still gonna fall; it will not fall WesaDrak. Only 1/3 of the currents would go threshold down into WesaDrak at this point. We will be able to create a quarantined fall point. We will be able to create a quarantined fall system. It's called a Lone Star fall path. There are two other systems in our Eeka-Veca system that had gyrodome technologies that are still functional that can also still experience that. That means they won't be assimilated not into the WesaDrak Blackhole (54) of _____

Disc 1
1:36:13

But Sol was murdered
March '05 - so this system
will go Nova before 3BY
The Bourque
via the matrix

Sirus B
Maha-faji

Not into any. So at least they will still have the opportunity in fall to have about 3BY left of thier own evolutionary thrust and they'll have to work out thier issues together. But it means this Planet - this Solar System basically - because this Planet can actually be used as the anchor for our immediate solar system. So this solar system and two others. One, I believe is the Sirus B system. And one - I forget where they said, I don't think they said the other one. It's part/a part of Andromeda. And we're gonna get into something on Andromeda that was what they wanted to get me to in this history today that they've never said before and this was on high security. So as we go in the reading you'll see about something none of us knew until today about Andromeda. There's a part of Andromeda that will fall Wesa Drake at this point. There's a part of it that will fall Lone Star fall. And there's a part of it that something else happened to that was good a long-long time ago. And this is why it's from that system that we see as the Andromeda Galaxy that seems like a Galaxy far, far away that used to be part of our universal Ecka-Veca System. There's going to be - a part of the Arc of Aquari will come in to our Matrix from that direction [...] when they could finish the quarantining of the Bourque Matrix w/o wiping

Disc 1
1:37:44

Out the life field in our Eckasha's Ecka-Veca system. At this point, the life field in this system's done a pretty good job facilitating it's own wipe-out. But it had a lot of help. The problem was the Bourgeois Experiment that got set loose all along is what created the whole fall (of Lyra) drama here - back to the fall of Lyra etc. But we are in that time now where the gyrodome KR4STHL River technologies are going to be opened. What they will simply do is interface with Threshold's Spiral and they will bend $\frac{2}{3}$'s of it - They're strong enough to bend $\frac{2}{3}$'s of it back and reverse the reverse current which means make it go forward. Which means turn part of it's coding back into KR4STic. Enough to create a loop on itself [...] so it will create a self-quarantine effect around whatever is running the Threshold Spiral. $\frac{1}{3}$ of it will still be able to pull $\frac{1}{3}$ of the grids of whatever threshold is running down into ~~WESA~~ WESA Drak. But $\frac{2}{3}$'s of it will stay in Lone Star fall probability. So this is very, very good news compared to the news we were getting when Threshold was Activated. Because it's basically "the whole thing is going down WESA Drak Blackhole, we can't do anything about it. What the Bourgeois wanted to do over in their Matrix, was actually first pull this matrix into WESA Drak

Disc 1
1:39:00

Confirmed the KALE-DEMA so is this saying that
and of all happened to Bourgha Virus B & part of Andromeda
Matrix March 2007 are Blackhole/going black.
(three months later) because "certain systems" and
SUS Handbook those are the ones cited as gyrodome

except they flee
ones that ships
in ships

because it was the easiest way to go first, and then
pull WESA Drak & WESA Dec into thiers. So it was
a big assimilation plan. And by doing this it will
not only stop this whole system from going WESA Drak
and then Bourgha. It will also prevent certain
other ones from falling. Certain other systems
that will go blackhole - or are already blackhole
but they will not be pulled into the Bourgha Matrix.
Which means the Bourgha will not be able to con-
tinue thier habit of eating living things anywhere
near them. There is also a consequence to this.
When the threshold reaches a certain point of
turning back on itself, it builds up so much
frequency that it will cause the implosion of
the Bourgha Matrix. They will go home as Space
Dust and that won't be instant as far as when
this happens. But once they are quarantined -
if they are throwing current and all the gyro-
dome is meant to do is bend it back and make
it circle thier own system. If they stop the
current, they would stop, or post-pone thier
own implosion. But they created that and they
will ultimately experience what that means as
far as space dust return. But this will accelerate
the process. The harder the push threshold the more
we will get 2/3's of that frequency to turn back

Thought the Arc
of Aquari was
cut in 2012???

around into the quarantine states. Earth will have a quarantine state that will be modulated by the Arc of Aquari. The KRYSTAL River. That will allow enough of a link - even before we had talked about when the Earth system fell, and when this veer fell there would be the possibility of KRYSTAL Fall with the Hub connection. We lost that with the fall of the Rainbow Bridge and the Thothian Shield. But, they still have the ability to - the Earth system and the Sirius System, and some part of the Andromeda System - will still have the ability to have the threshold currents kept in the reverse of the reversal, keeping a quarantine where the others can't get at them. Right, where it's actually protecting them from the Bourgha as the Bourgha are getting past of their threshold spiral back around them where it's making it so they can't break out like they are used to doing. So nobody's shooting energy at anybody here except for the Bourgha and the ones working the dragon agendas. The Red/Green dragons who are throwing energy at each other. Alright, the Red Dragons have sided with the Bourgha. They don't realize what the Bourgha have in-store [...] This is the one way out for anybody who's not really interested in participating in these war games any more and wants to get out of the victim/victimizer

How?

Disc 1
1:41:50

pattern and all of that, that is running on those currents. You're gonna see those threshold currents kick up that VU program [...] and it's gonna be running in people's bio-networks because our DNA and therefore what we're composed of here - our elements on the molecular level will be running programmes that create impulses, that create chemical reactions in the body, that trigger the fight/flight response, that are going to move large amounts of people into behaving very badly toward each other. And I do believe the Reds are in the Victim-izer position right now and the Greens are in

1:44:33

the Victim position [...] and it means we will still be able to, if we can hold these activations, first of all stop reversal of the Indigo Shield which means they won't be able to use a reversed Indigo Shield to access on the Threshold currents the Urtha gates. And we still have Arc 7, partially.

Urtha
→
→

It's surface level is compromised, it's core level is still partially viable so it can still plug into Spanner 7 which will plug into Urtha gate 7. So we still have the 7-set open if we are able to anchor the Arc of Aquari tomorrow morning - the KRUSTHL River, the First KRUSTHL river run. And this is why we're throwing a lot of data at you

Disc 1
1:45:33

[...] if we are successful in anchoring the KR4STHL River, the Arc of Aquari tomorrow we will be able to move forward with the Spanner program. Which means Spanner 7 will be able to be open and it will get stronger. Spanner 7 is the gate, the one gate left that can get people out physically if it stays viable to Urtha when the time comes for Starfire. It means there will be training for some people who are biologically capable of gate passage. Some people aren't - they have too much DNA stuff to clear and there's not enough time to do it. But that's OK because even if a person goes thru thier natural Bhardach which

1:47:15

means they drop the body [...]. What matters is where you go - either with your body or with just your spirit. Are you gonna ride KR4STHL Spiral so you're capable of being hosted thru Urtha into the Adashi Cycles that will take us back in to Source again and then back out with the re-birth in the new creation. Where we will still be in the eternal life matrix of the Out Flow from Source & the back flow. Or will you get caught in the Threshold Spiral which will pull you into black hole fall of one kind or other. Now the worst b/h that you don't want to get involved in is that 1/3 that will still get pulled into WEsaDrak. Because WEsaDrak will be a sitting duck for the Bourgha

Disc 1
1:47:56

But they
also have worm
hole into our sector
Parallel right? What
is the status of inner earth?

This was →? Sol is going thru Bhardeah
before Sol was murdered
→
Confusing
?

and even if Bourghs have partial quarantine they already have wormholes into that Black hole system on the Wesa' side. So, the other option for those who won't be able to ride any KR45THL because there's not enough coding in the DNA template or the shield. There is still the opportunity of the lone star fall. Which means there is still that quarantine in on itself and the Threshold is turned ~~on on itself~~ around and that keeping the Threshold running un naturally for itself. Which means running more like the KR45T Frequencies. It just doesn't have as many frequencies as the KR45T dimensional structure would. At least they would get about 3BY left of the Solar System's evolution. Of things working out on this planet. It means this planet won't be blown to smithereens - what it means. When we encounter between 2047-51 the Starfire cycle because w/o that buffer, that quarantine fence around it, this planet was gonna fall and it was not going to be here anymore. This was going to be the annihilation point of what we know as life on Earth. Because Earth was falling elsewhere and what was on it was going to be turned to space dust but in an irradic way by the Threshold mechanics.

Disc 1
1:49:15

So at this pt. because the Aquart have agreed that they would release thier part of the KR4STHL Spiral - we have the KR4STHL River currents available it means we can do lone star fall. It means Earth and this Solar System can be kept stable. So can the Sirius B System for probably similar reasons. They have a gyrodome, it can be used to do this and it's a better option than the others. But there's still the option of getting out of it and being able to ride the natural KR4STHL Starfire rebirth process back. And that's what we're aiming for - that $\Sigma \dots$ will be the path that we're trying to get as many people who can hold it on. $\Sigma \dots$ If for some reason we are unsuccessful the threshold grids are activating. The chance of the Indigo Shield getting ripped apart is pretty good. Because we won't be able to buffer the blast that the people who are running threshold, the Bourgha are planning to hit the Indigo shield with tomorrow. And if the Indigo Shield reverses it means that the Urtha gates can be compromised by the Bourgha. If that occurs what we will see very rapidly is all those official denial contracts of those gov'ts down here ripped up very fast b/c we'll find ourselves in a Tri-Matrix war with things flying like we've never seen. We talked about, in Morocco

1:51:00

Urtha →

Disc 1
1:51:45

Fall of Tera

briefly about how things went worse during our time when we were trying to do gridwork in Morocco because something happened in Density 2 And we said the Budhara had attacked directly, Physically attacked Tera - which is Alceyone when we look at it from down here - and caused/used the templar, the stargates to reverse the Staff. And because of that. That was it - this Matrix was falling and Earth's Staff was gonna reverse at that point. That's when the Tauren in Earth had no chance of not activating on Threshold. What they hadn't clarified before was the distinction of Budhara's. There are regular Budharas that we know have sided with the Anunnaki and they've made hybrids with the Anunnaki that were called the Shantakelle. And that they've stood against KR45tic races a lot since their fall. But there's another group called the Bourgha Budhara. These guys side with the Red Dragon side. They are a Bourgha hybrid race. And the Budhara, the regular Budhara despise them. So at least right now during all this we have Budhara that were once opening wormholes on the Pacific side, the LA-Estackhi wormholes

so they do have wormholes directly into this earth so how does Gyrodome protect?

Disc 1
1:53:00

They did that because they were afraid that this was going to happen. So they are at least helping at this point. So the Budnara are going to try to weaken Threshold, because they can't access KR4STHL Spiral, but what they can do is siphon energy off threshold enough to weaken that as we bring in the KR4STHL River frequency which will create the balance that will allow the link to occur.

So - all of a sudden - never know who your friends are these days. The Budnara don't want the Bourgha to win because they don't want to live in Bourghaland either [...] Once upon a time the Budnara were a KR4STic race. Just like once upon a time the Adoni were a KR4STic race. Both of them fell, guess why. We'll see that soon. But tomorrow we have a Stand to make like never before. We are in the grids that are directly connected to, interfaced and amplified by the Beloveds into Arc 7. We are going to open Spanner 7 tomorrow with the anchoring of the Arc of Aquari which is the KR4STHL River current of the 3 Eckashas. So anybody who wants to be there with us is very welcome to do that. We're probably going to do that about 6:00 in the morning we'll start. You

Paxos mentions Budnara
(check this for more
details) think it's towards end
remember they are from
parallel Eckashas 4, one of 3 races

1:54:14

Disc 1
154:50KRYSHTL River was
linked through the Prima
Edonic Consummate Twin Pair in

a wedding that anchored the Arc of Aquari

will see a wedding. You will see a wedding alone for the first time with 6 ministers present. It is a wedding alright. It's a 3-way wedding. It is the wedding of the three Streams - the Echkasha KRYSHTL Spirals. And we have to anchor that. So we will be also exchanging our vows and opening the Edonic level here because it will not only run into the outer domains here - it will run from here into the Edonic levels to make a full link thru the Edons so they can link it through the Edons. This is BIG. This is big time, and a long time coming 480BY is a really long time when you're on Earth. How long it looks like to them, it could have been like two days - I don't know. But here it seems like forever. That was the beginning of the drama. And this is the end of the drama. The Aquari are coming on board. The KRYSHTL River is going to flow. And that means the VV game is going to be stopped. And it won't be perpetuated on on to other matrices like it has been. So this is a long time coming [...] if we succeed tomorrow it will have direct bearing on the kind of mess that will may or may not become. So there is some direct 3D benefit that is associated with it. [...] //reading resumes// We were talking about the Aquafare incarnating into the outer Domains to re-seed a Tri-Matrix KRYSHTic Echa-Veca race line called the Aquari. So the Aquari race lines were expanded from

Angelic humans have
only been here 560MYHow will KRYSHTL River
stop VV games? It is a

Conscious Choice - KR is to support life

Disc 1
1:57:15

thier Aquareon home Matrix in the Parallel adjacent Eckasha into the WEsALA Matrix of the adjacent Eckasha and into the Adora & EtorA Ecka-Veca Systems of our Eckasha creating a Hub-passage-capable KRYSTic KRYSTHL River Aquareon lineage within the organic KRYSTic Race lines of the outer Domains of the three systems in the KRYSTHL River Cooperative. And those would be the people here that responded to the Aquareon Call. Alright. This is a long time ago. This started way before humans. But this race line was stepped down. So there are the Aquareon forces here among us. And that's the call that was put out. They are the only ones capable of Anchoring the 3 Eckasha level KRYSTHL River. So just so you know these races from long, long ago they are our ancestors. And there are versions of the Azurites that were crossed with them. There are versions of our founders races here that were crossed with them. There are versions of the Angelic Humans that were crossed with them. And then is something that later they're gonna talk to us about - either in the next W.S. here or in the Peru, I'm not sure. But it gets into solving some mysteries about what are called the 12-feathers which happen to be Aquareon race lineages that came up in our Native peoples. And they have a whole lot to do with Native

Disc 1

1:58:46

American history as well as aboriginal history and Inca & Peruvian Indian history. So these races that you're hearing about now 450 BYA these were created. This is a race line that was brought into our race lines here and they are - as a force of us on the planet that carry these codes. And we will be able to run the KRYSTAL River and that will allow for the Lone Star fall probability instead of full WESA Drak fall and Threshold annihilation for the life field of this planetary system. So it's a big thing I just wanted to point out that they're not just an ancient race. They are a race of people among all of the races - there'll be little bits of them here there & everywhere. Just like Azurites and Indigos - you have them here, there & everywhere. They're a strain of indigo Azurite that were crossed with the Aquari in what were called the Nurseries. There are certain nurseries that I just found out about. And there are other nurseries that I have memories of being here on Earth that were taken out of Atlantis when it was getting really, really bad. And seeded here the 12-Feathers. Where, there was once 12-tribes of Angelic Humans and their Cloisters. And they were going down genetically by the time the fall of Atlantis occurred. And there was an intervention done from Urtha by the Aurora races who are directly connected to the Aquari. And they were brought

hopefully only Type 1 & 2 indigos - Azurites are not just indigos - indigos are incarnated Eieyani. So this was the primal sound & the consciousness of this Matrix hybridizing w/ Aquari. Type 1's are walking (48-shard) 12 up to 36 (I think)

Disc 1

in and they were picked-up-members of them that wanted to go-were picked up and hybridized, willingly by consensual agreements with the Aquari lines and then they were brought mostly to the Americas. To N. America and to South America. And they were nurseries for new race lines that would take the Angelic human code and first of all stop it from being totally degraded/degraded to where it couldn't run the gates at all any more. And it was enhanced as well with the Aquari coding. So there are branches of that among us. A lot of our Native American People and a S. American Native People are connected directly to them and so are certain groups of the aboriginal

2:01:30

People [...] **300** BYA The fallen Bourgha Musala AhLama time raider assimilators races from the Parallel Eckasha fallen Ecka-Veca system advance thier time-rip technology forcing a time-rip triangulation between Density 4 of the Bourgha WEsala and our Adora matrices. The Esala succeed in temporarily sealing the Bourgha rip in thier matrix. But the, then KRYSIC Budhara and AdonI races of our Adora entered KRYSI-fall status in thier unsuccessful attempts of sealing the Bourgha rip in our Adora Ecka-Veca. The Bourgha forced hybridization upon the Budhara races to advance thier own genetic capacity Creating the Bourgha-Budhara time raider 68

race line which sought to destroy the KRYSF-fall
Budhara races who had quarantined the
AdorA Bourgha rip in their black hole
during the process of their fall. The Bourgha
later succeeded in forcing another time rip into
the AdorA Eumbi Lock Domain between Density 1
& DN2 in the AdorA system by which they were
able to rip through into our EtorA Eumbi
Domain to re-establish the time rip triangulation
via the EtorA/AdorA Eumbi Lock // [...] in a
Kathara Grid structure you have the lock system
between Density 1, SG 1, 2, 3 and Kathara Ctrs 1, 2, 3
and you have that little square on the Kathara
Diagrams that represents the Eumbi Lock and the
Eumbi Flame. And then you have DN2 where
you have D4,5,6 & K4,5,6. So when we're referring
to the Eumbi and a time rip being made into
the ^{universal} Eumbi in our Echa-veca system. This is
what that is talking about. That is very serious
stuff. It's like a real big problem that's not easily
fixed and it's still there. And they've opened it. //
Reading resumes // The Budhara KRYSF-fall races
attempted to stop the AdorA Eumbi time rip and
lost the AdorA Hub connection by which they held
KRYSF-fall status. The Budhara and the Bourgha
budhara have remained in continual war

(p.5)

Since this time (300 B4A) with the fallen
Budhara patrolling the AdorA side of our
Eumbic time rip. The Bourgha-Budhara captured
various race lines from our AdorA & EtorA Veca
Domains and hybridized with them to form
the Bourgha Eubi:incEubi & sucEubi // So it's
the incubbis & succubis of history which are
the he and she devils that use sexual energy and
suck energy off people through sexual encounter.
This is where those words came from therefore the
Eubi races // ^{→ reading re-starts} Void lock races of the Eumbic
domains that exist is our Veca System which
progressively raided upward from our Universal
Eumbi Lock to the Universal Lajna Lock between
Density 3 & Density 4 Veca Domains // ^{→ reading stops} So they
pierced it down between Density One and DN2.
The Time rip pierced at the lock btwn DN1 & DN2
and then once they had made it through there
and created their hybrid Eumbi races - the
E-U-BI is from the Eumbic referring to the
territory of the Eumbi. They went from the
Density 1-2 Lock and pushed their way up
through between 2-3 and then between 3-4.
So they could raid from the bottom up. And they've
appeared in our history here as like Demons and
things that people evoke and call through

Disc 1

2:06:00

and stuff that they brought in in the Mantank Experiment & The Philadelphia Experiment - were bringing them in, alright. So as far as what happened there, they opened that rip. And it's connected to the Phi-Ex Matrix which is a whole set of wormholes and stuff that are activated now over on the East Coast. So, anyway I just wanted to explain the raiding from the bottom up is where they went. And this is how our Matrix ended up in the messy fall dramas that it went into from the fall of Lyra II ^{→ reading resumes} 250 BYA pt.1 Bourgha Eubi time raiders use EtorA Rajna Lock Domains to infiltrate Density 3 Belletrix & DN4 Lyra-Vega Systems of our EtorA Vega. Bourgha Eubi force hybridization with certain Seraphei & Elohei founder race groups of SG11 Areyon & SG10 Vega creating the Seraphim & Elohim compromised Bourgha hybrid races beginning the de-evolution of certain EtorA founder race strains that culminated in the fall of Lyra drama in our EtorA Vega. ^{→ reading stops} [The things that were just read that happened between 480 BYA & 300 BYA between these 3 time Matrices and the fallen one which is our parallel Eckasha Ecka-Vega System. These all were the fore-runners and what caused the fall of Lyra drama. When we

RAPE
Creates

ALL agendas trace back to Bourgha

EtorA via the DN3 EtorA Bourgha time rip. The Anti-Anu Bi-Matrix Fallen Mala Daka Draga Yuun Omicron Equari fallen White Dragon race line is born in the EtorA system // These are the Maldak Dragons, Alright. I mean once upon a time we didn't have an asteroid belt, we had SG5 there on our Solar System SG5. The asteroid belt was the planet Maldak. And that has been destroyed. And that Maldak was affiliated with these. It was populated by the Maldakian White Dragons. So - just so you know // ^{read} 130-120 B4A the EtorA White Dragon Equari Omicron race line split and hybridize with fallen Wesa lines forming the original dragon agenda Anti-Anu Red Dragon plus Eсадrak and Metatronic agenda pro-Anu Green Dragon and WesaDak lines // That was putting a lot into one sentence. What it was basically saying was when they split - when the White Dragons split, that between 130-120 B4A - they split forming the two groups that this is where you start to see the Red vs. Green agenda happening. Alright you had the original agenda, the original Dragon Agenda which was destroyed the Anu that agenda was held by 75

they're called the Anti-Anu Red Dragons, they hybridized with the WEsaDraks as well. To bring the WEsaDrak coding in. So, the Red Dragons are associated with the WEsaDrak and Anti-Anu which means they are Seraphim based and not Elohim based. And then the other ones that developed the Metatronic technology. So the Red Dragon groups are the ones associated with the Bourgha that developed the time-rip technology. Then The Metatronic crew were Anu. Metatron had fallen. It was originally part of a host set that was brought into our EtorA system to try to help regenerate bio regenerate the KR4ST code. And some of the Fallen Anu races - But the Metatronic group fell as well. So the Metatronic code for artificial life. Code for black hole systems which is the base of the Beast machine/aparatus. They were on the Anunnaki side. They were on the Anu side, or the fallen Elohim. So here you're actually seeing what they used to sometimes refer to as the Angel Wars where the Elohim and the Seraphim were fighting with each other. And what it really was was a manifestation of the Red Dragon/WEsaDrak vs. Green/WEsaDek

Note what it really was is the Bourgha virus driving separation

Disc 1

lines that were fighting over the time rip and now the Metatronic technology. So this was an evolution of a drama. The whole thing started with a really bad idea [...]. What they're trying to position people now on this planet are where you will have the Green Dragon crew will be the ones that are Christian & Jewish. They are trying to move that off planet. They are trying to move populations into Christian & Jewish people are being moved by the Green Dragon crew that are affiliated with the Anu and the Elohim races. And the people that are of the Muslim persuasion are being moved by the Reds. And they are going to try to make it a Red/Green war on this planet btwn. the Christian people and the Muslim people

Hull? How does Warm hole technology stop time rip technology? Sounds more to me like they were being competitive and wanted to be better-armed than the Bourgha. It's not like the Beast is a protection field.
Remember, the Green Dragons are the children of the Bourgha. So what "side" are we talking about? It's all one BIG Bourgha family only with different colors of ONE.

VECA/VECA systems. The White & Red Dragon Lines Omicron Drakonians, The Eans WesaDraks & Bourgha Budhara assist in Bourgha Musala Ah Lama time rip invasions in the EtorA & AdorA systems from Parallel Eckasha fallen Bourgha Eeka Veka. Tri-Matrix Dragon Wars unfold. Fallen Green Dragon, Metatronic Anu Elohim, AndromE WesaDak & AdorA Budhara begin full conquest and Beast Machine Building in our EtorA Veka to prevent our Veka's assimilation into the parallel Eckasha Bourgha Eeka Veka Black hole. Competing Dragon races orchestrate major hybridization raids upon the life field of the EtorA and AdorA systems. // Did you catch that little thing? The Green Dragon side developed the Beast Machine with the Metatronic Code because they were trying to prevent the Bourgha time rip from coming in. So, it's like Everybody had a reason [...]. 100 BYA the TriMatrix KRUSTHL River hub councils assist outer domain KRUSTic Aquari and Azurite Aquareon tri-matrix races to enter KRUSTic biogenesis attempts for numerous AdorA & EtorA race lines that had been partially compromised by forced fallen dragon race hybridization. The Gold Dragon Aquari Azurite line was born into our EtorA & AdorA Eeka Veka Systems via HUB Domain passage with the purpose of attempting KRUSTic regeneration of partially fallen White Dragon infiltrated races.
* NOTE: BOTH situations involve BREEDING compromise gene code with higher genetic code. So... who's agenda is served by trying to BREED your way out of it? the child is the same either way

Result... Compromised child with high KRYST coding

1 BYA Portions of the Gold Dragon Aquari lines
fell to White Dragon assimilation during Bio-
Regenesis Attempts. KRYSTHL River hub councils
again assisted with KRYSTic Aquari Azurite Aquareon
and remaining KRYSTic Gold Dragon regenesis lines
Seeding the Blue Dragon Edonic Aquafare Aquari
lineage (these held the antidote dragon coding and
gyrodome KRYSTHL River activation codes in the DNA
but without any "Dragon" coding). So the lineage
came into the outer and middle Edon Domains
of the Tri-Matrix system. 1 BYA - 700,000,000 YA
the KRYSTic Gyrodome system was progressively
seeded into the Eeka-Veca regions of the tri-
Matrix System and the 12-feathers Aquafare Aquari
Aqualene tri-matrix regenesis race lines were then
seeded. The Dragon wars continued to compromise
the structural integrity of the EtorA Adora
Eeka-Veca systems and the Metatronic Green team
advances the Beast Machine & LA-E Budhara
wormhole complex development to hold off
Bougha time-rip assimilation. The Green's Blue
fire sword and the Countering Red's spear of
Destiny Metatronic Beast Blackhole machine hi-jack
technologies are developed as the fight for the control
of the Beast continues among the Dragon races
and their respective allies from time-to-time. The
Bougha Musala AhLama of parallel Eekasha fallen
Eeka Veca advance the Eumbi time-rip triangul-
ation into the Metatronic Core of the

Reversal?

Beast Machine in our Eckasha setting the beginnings of the Threshold Glass Tower FibNochi Spiral technology into our Eeka-Veca System. The Dragon Wars escalate onward in DN3 culminating in the partial fall of our Universal SG 9 Mirack Andromeda, Universal SG 8 Mintauka Orion and Univ. SG 7 which is Arcturus. A large portion of our Universal Veca is pulled out of pending fall by the Aquarcon Races and is quarantined under KRYSTHL River Council protection becoming what is known today as the Andromeda Galaxy. (name is actually the Aquinos regensis nursery) a regenerating KRYSTIC galaxy originally part of our imperaled Eeka-Veca Universal StarGate System and galaxies like the Milky Way caught in the crossfire of the Dragons and The Beast //

→ ^{Commentary} 80 This was a piece of new information that's been under very high Security Clearance as far as I've there have been, portions of Andromeda that fall. There are portions of Andromeda that will fall. But that thing they call the Andromeda Galaxy as a separate galaxy from the one they call the Milky Way. That is a Host Quarantine Field that has been controled since that time 700MYA by the Aquari - the Aquari line races. Which particular ones. And they have the Aquinos regensis nurseries. And I have a feeling that's where we

Disc 1
2:30:00

Blue-Rainbow?

might have to go after Urtha, once we get out on Starfire. Because that, I do believe is where they will seed what they have said - Our petitions as Indigos & Azurites from this system. Those who can get out on KR4STHL are being offered the opportunity to reincarnate through the AquafarE to go back into the Edons. so they don't have to incarnate back out in the outer domains if they don't want to in Starfire. And I do believe it has to pass through this system they just let us know about today. [...]

this is where those frequencies are going to be coming in from when we anchor the KR4STHL River tomorrow. This is where they'll cross through into our System. And it seems that they pulled it out of fall and put it into host and it's regenerated since that time 700 MYA. So there's a lot more we're going to be learning on that. But there's something exciting about that connection. It's like OK we get to Urtha and then what? Well we go to Edon somehow - Well, that might be the how. That might be the map from here to get into the Edon ride through Starfire. So, Andromeda had a whole new meaning these days. 11.570 MYA ^{resumes} The DN3 Dragon wars continue and escalate leading to the Galan Orion Wars and therefore the partial fall of Gaia Pokris. 568 MYA the oraphim 24-48 DN2-DN4 Sirius B Proceyon Orion Mintaka

Disc 1
2:33:20

Gaia Polar's first angelic human lines are seeded in Our EtorA ueca // That's the Oraphim when the Oraphim out of which we all came were created. // ^{resumes} 560 MYA The Turaneseum 1 Angelic Humans 12 tribes of Tera Ancyone & the Maharaji 24-48 Sirus B are seeded. 550 MYA DN'2 Teran/Sirian Wars, the fall of Tera Drama and the Amenti Rescue Mission is engaged. Urtha-Sala hosts begin at this point, 550 MYA. And finally coming down to 250 MYA - 25 MYA the Turaneseum 2 Angelic Human tribes of Earth seeding 1 are seeded in DN'1 PKA Parallel Earth and PCM Earth. And at that point Earth's recent/contemporary history begins 25 MYA.

2:34:20

(Reading ENDS) Now from that point the Voyagers book picks up on the history lines and explains all sorts of things that have happened here on the Earth territories that led to what we are now experiencing as the Beast Machine. But we finally got to see where this mess started. And it started with the Bourgha Matrix of the Parallel Eckasha Ecka-veca system that fell. So it kind of a round-up on the history. There's lots of pieces in between [...] KRYSTIC races don't like the fighting they never did. They don't like to fight. But they will stand. If we didn't I think somebody might have probably figured out how to override the
